

I respectfully submit this leave application to inform you that my child is unable to attend school due to illness. Over the past few days, my child has been suffering from health-related issues which have caused weakness, discomfort, and fatigue. After observing the condition carefully, we consulted a medical professional who advised complete rest and proper care for a few days to ensure a full and safe recovery. Attending school during this period may worsen the condition and delay the healing process, which could further affect my child's overall well-being.

As parents, the health and safety of our child remain our top priority. We are closely monitoring the recovery process and strictly following the doctor's instructions, including medication, adequate rest, and a balanced diet. During this recovery phase, my child is not in a condition to participate in academic activities or attend regular classes. We understand the importance of education and regular attendance; however, health concerns must be addressed first to ensure long-term academic performance and personal development.

Therefore, I kindly request you to grant leave for my child for the mentioned duration. I assure you that once my child fully recovers and is declared fit to resume daily activities, regular attendance will continue without interruption. We will also make sure that any missed classwork, assignments, or lessons are completed promptly. I sincerely appreciate your understanding, support, and cooperation in this matter and thank you for your consideration.
